SHIV KUMAR *DevOps Engineer / Platform Engineer*

shivkumar.techpro@gmail.com +91-8800911290 NOIDA, Delhi NCR, India

PROFESSIONAL SUMMARY

Senior DevOps & Platform Engineer with 12+ years of experience building and automating cloud-native infrastructure, CI/CD pipelines, and production monitoring systems across telecom and enterprise platforms. Strong hands-on expertise in Azure, Kubernetes, and Terraform, focused on delivering reliable, scalable, and automated systems in live production environments. Experienced in supporting platform engineering initiatives aligned with modern MLOps-ready workflows.

KEY ACHIEVEMENT

Performance Metrics,

- Improved deployment speed by ~70% by implementing automated CI/CD pipelines across multiple environments.
- Reduced manual infrastructure provisioning effort by ~80% using Terraform-based automation.
- Decreased MTTR by ~40% by building centralized monitoring and alerting systems using Prometheus, Grafana, and ELK.
- Delivered consistent zero-downtime releases by implementing automated rollback and health-check-based deployment strategies.

TECHNICAL SKILLS

Cloud & Platforms: Azure (VMs, VNet, AKS, Storage, IAM, ACR, Load Balancer)

Containers: Kubernetes / AKS | Docker | Helm

CI/CD & Automation: Azure DevOps (YAML) | Jenkins | GitHub Actions

IaC: Terraform (modules, remote state, workspaces, variable files)

Build & Artifacts: Maven | JFrog Artifactory | Nexus | YAML pipelines

Monitoring & Logging: Grafana | Azure Monitor | ELK Stack

Telecom & Ops: NMS/EMS | RCA

Scripting & OS: Bash/Shell | YAML | Linux (Ubuntu)

Version Control: Git | GitHub | GitLab | Bitbucket

AI & Intelligent Automation : RAG | MCP | AI Harness

PROFESSIONAL EXPERIENCE

Technical Lead — DevOps & Platform Engineering, *TCS Limited*
Jan-2024 – Present
Noida, India

- Designed and provisioned Azure landing zones using Terraform**,** automating deployment of core resources (VMs, VNets, NSGs, Storage Accounts) with Infrastructure as Code.
- Implemented AKS-based deployment workflows with health checks and automated rollback, enabling consistent zero-downtime releases across environments.
- Built and centralized production observability using Prometheus, Grafana, and ELK, with automated alerting and runbooks — reduced MTTR by ~40% and improved on-call response efficiency.
- Automated Azure infrastructure provisioning using reusable Terraform modules — eliminated environment drift across 3 environments and reduced manual provisioning effort by ~80%.
- Improved release reliability and deployment consistency across environments, ensuring stable production rollouts with zero rollback failures.

Senior DevOps Engineer, *AGNITY Communication Private Limited (a TNS Company)*
May/2023 – Jan/2024
Noida, India

- Built and optimized CI/CD pipelines (Azure DevOps + Jenkins) to automate build, test, artifact management, and multi-environment deployments — improved release cadence by ~70%.
- Developed reusable Terraform modules for Azure infrastructure — standardized provisioning across teams and enabled consistent, zero-touch environment setup.
- Managed containerized application deployments on AKS using Helm — implemented rollback mechanisms and zero-downtime rolling updates, reducing manual effort by ~60%.
- Improved artifact lifecycle management using Maven, JFrog Artifactory, and Nexus — enforced versioning standards and ensured traceability from commit to production.

Senior DevOps Engineer, *Sterlite Technology Limited.*
June/2022 –Apr/2023
Gurugram, India

- Managed Azure infrastructure using Terraform (10+ reusable modules) with remote state and version control, improving deployment consistency by 30%.
- Secured infrastructure using NSGs, Firewalls, VPNs, Private Endpoints and optimized Azure costs by 20%

- Optimized Jenkins + Maven CI pipelines with parallel execution and artifact caching — reduced build time by ~40% and improved pipeline reliability.
- Built monitoring and logging stack using Prometheus, Grafana, and ELK — enabled proactive issue detection and reduced fault diagnosis time by ~35%.

DevOps Engineer, *UST Global Private Limited* Nov/2021 – June/2022
Noida, India

- Built CI/CD pipelines using Jenkins to automate build, test, artifact packaging, and deployment for telecom applications — transitioned team from manual to automated releases.
- Containerized applications using Docker and deployed on on-prem Kubernetes — implemented rolling updates and environment-based configurations for consistent delivery.
- Automated environment setup and deployment workflows using Bash scripting — reduced setup time by ~35% and improved release consistency.

Deployment Engineer, *Eminence Softech Private Limited.* Jun/2020 – Oct/2021
New Delhi NCR, India

- Managed end-to-end software deployments across lab, pre-production, and live environments using standardized runbooks and version-controlled configurations.
- Automated deployment validation and routine tasks using Shell scripting — reduced manual effort by ~40% and improved deployment consistency.
- Supported Linux-based systems (RHEL, CentOS) including setup, configuration, and monitoring — ensured stable environments during release cycles.

Network Operations Engineer, *Link Quest Telecom Limited, Telecom Network Solution Pvt. Ltd, RENComm Teleservices LLP Aerial telecom Solution Pvt. Ltd,* Mar/2014 – June/2020
Gurugram & Hyderabad, Ind

- Monitored and managed 200+ 4G/LTE RAN nodes using NMS/EMS tools — ensured SLA compliance and handled P1/P2 incidents within defined targets.
- Reduced alert noise by ~40% by standardizing alarm classification (P1/P2/P3) and eliminating recurring false positives.
- Performed root cause analysis using logs and performance data — improved resolution speed and reduced repeat incidents.
- Configuration of New connectivity with other operators (Intra Circle), E2E connectivity & AT, Call testing.
- Responsible to check the status of the Pre & Post activity before & after the activity (Core Node Up gradation / Expansion etc.).

CERTIFICATES

2021: Certified Associate in **Python Programming** (PCAP)

2026: Microsoft Certified: **Azure Administrator Associate** (AZ-104)

2026: Udemy: **Artificial Intelligence** & Machine Learning for Business, **Cybersecurity** Risk Management, and Cyber Security Foundation

2026: Databricks: Accredited **generative AI** Fundamentals.

2026: O'Reilly Course: **Google Cloud** Fundamentals.

2026: Microsoft — **Azure** Certification (via TCS Training Program)

EDUCATION

MANGALAYATAN University, Aligarh, *B.Tech. — Electronics & Communication Engineering* Aligarh (UP), India
